Work Plan and methodology:

Plan of research Work

A. Exhaustive Literature survey

Source of the Data

- Journal and Publications
- Internet
- Laboratory based studies

Method of collection of data
By animal experimentation and laboratory investigation

B. Procurement of materials, identification and drying of crude drugs

C. Phytochemical Evaluation

1. Extraction of crude drugs in hydroalcoholic solvent
2. Determination of Percentage Extractability
3. Qualitative chemical evaluation

D. Pharmacological studies

Antiurolithiatic activity

E. Formulation of poly herbal formulation

F. Evaluation of poly herbal formulation

G. Compilation and Conclusion
