WORK PLAN & METHODOLOGY:

1. Literature survey:
   By searching different research articles & patents.

2. Selection of drug candidate
3. Selection of various oils for solubility study of drug
4. Selection of various surfactants
5. Selection of co-solvents
6. Analysis of drug:
   A. Identification
   B. Solubility
   C. Determination of λmax
   D. By IR spectroscopy.
6. Formulation of Self Emulsifying Drug Delivery system
7. Evaluation:
   A. Visual inspection
   B. Droplet size
   C. In vitro drug diffusion study
   D. Viscosity
   E. Drug content
8. Stability study
