**Objective of Research:**

1. To have a data bank of women entrepreneurs
2. To be torchlight to government for understanding women entrepreneurship better.
3. To set an example for the other women to begin entrepreneurship

**Utility of the Study:**

Women’s entrepreneurship is both about women’s position in society and about the role of entrepreneurship in the same society. Women entrepreneurs faced many obstacles specifically in market their product (including family responsibilities) that have to be overcome in order to give them access to the same opportunities as men. In addition, in some countries, women may experience obstacles with respect to holding property and entering contracts. Increased participation of women in the labour force is a prerequisite for improving the position of women in society and self-employed women. Particularly the entry of rural women in micro enterprises will be encouraged and aggravated. Rural women can do wonders by their effectual and competent involvement in entrepreneurial activities. The rural women are having basic indigenous knowledge, skill, potential and resources to establish and manage enterprise. Now, what is the need is knowledge regarding accessibility to loans, various funding agencies procedure regarding certification, awareness on government welfare programmes, motivation, technical skill and support from family, government and other organization. More over Formation and strengthening of rural women Entrepreneurs network must be encouraged. Women entrepreneur networks are major sources of knowledge about women’s entrepreneurship and they are increasingly recognized as a valuable tool for its development and promotion. This network helps to give lectures, printed material imparting first hand technical knowledge in production, processing, procurement, management and marketing among the other women. This will motivate other rural women to engage in micro entrepreneurship with the right assistance and they can strengthen their capacities besides adding to the family income and national productivity.

**Scope of the Study:**

The women group income-generating project is one way of economically empowering women in India. It is therefore important that these MSEs succeed and be sustained so that the benefits derived from them are enjoyed by those involved and also trickle down to other people in the community who are not direct beneficiaries. This will make the economic base of women more strong enabling them to provide for their
families. Furthermore, it is believed that the economically worst hit women are in the rural areas hence the study provides important information to be used by donor agencies, non-governmental organization and the government in their effort to empower women and to develop the human resources required for India’s socio-economic development.

Women comprise half of human resources they have been identified as key agents of sustainable development and women’s equality is as central to a more holistic approach towards establishing new patterns and process of development that are sustainable.
